

## Pre-Med 1 Basic Examination of the Human Body

### Course Description

If you are considering the medical field or are curious about it, this is a great course to explore the possibilities! This course is an exciting introduction into the medical field. Geared for a middle school reading level or above, this course offers a truly unique and interesting way to earn a science credit. This is a very hands-on course -- perfect for the kinesthetic learner!

**Suggested Level: High School**

*Lessons: Hands-on projects give the student a genuine practical understanding of the medical field while teaching various techniques used by real doctors. Assignments allow regular review and promote mastery of the subject. The lessons give the student the information necessary to move on with understanding. Video is incorporated to offer a visual component. Sound interesting?*

*Objectives-What you will learn in this course: Students will be introduced to :*

- *medical terminology*
- *anatomy*
- *medical equipment used in emergency medicine*
- *basic pharmacology*
- *basic & advanced patient assessment and treatment skills*
- *Projects, labs, and experiments*
- *Use medical kits- like real doctors!*

*Assignments- Your assignments will cover all of the objectives. Be an Apprentice Doctor as you explore the human body and complete a variety of hands-on projects practicing actual techniques used by real doctors.*
